Hyderabad, Telangana, India | +91 97012 86967 | kartik.sharma188@gmail.com | linkedin.com/in/kartik-yadavalli-52521741

PROFESSIONAL SUMMARY

Total Rewards professional with 10+ years of progressive experience in compensation design, administration, and consulting—with the last 4+ years in a dedicated India C&B leadership role at Cotiviti (3,000+ employees, \$100M+ annual program). Proven track record leading end-to-end compensation cycles, advising HR Business Partners and senior leadership on pay strategy, administering benefits programs, and driving process integrity through HRIS platforms including **UKG Pro**, **ADP Workforce Now**, and Workday. Strong analytical foundation—advanced Excel, Power BI, SQL—with hands-on execution across merit, variable pay, equity, and wellbeing programs. Experienced in M&A compensation workstreams, executive compensation support, and CPO-level stakeholder engagement.

CORE COMPETENCIES

- Total Rewards Program Design
- India C&B Strategy
- Variable Pay & Incentive Cycles
- Benefits & Wellbeing Programs
- Incentive Plan Processing & Compliance
- Base Pay & Merit Cycle Management
- Market Benchmarking (Mercer/Radford/WTW)
- Pay Equity Analysis
- Salary Placement & Job Evaluation
- M&A Compensation Workstreams
- HRIS Administration (UKG Pro, ADP WFN)
- Advanced Excel & Data Modelling

PROFESSIONAL EXPERIENCE

Cotiviti

Assistant Manager – Total Rewards (Promoted from Senior Executive)

Hyderabad, India
September 2021 – Present

- Own end-to-end design and administration of India compensation programs—base pay structures, merit cycles, quarterly and annual variable pay, retention awards, and education assistance—covering 3,000+ employees, for a program exceeding \$100M annually, with a full audit trail maintained at every stage.
- Run quarterly and annual **variable pay cycles** independently—managing large-scale payout calculations, data validations, and compliance checks against defined plan rules before loading into the compensation tool; coordinate stakeholder sign-offs and produce post-cycle summary reports for leadership.
- Manage the end-to-end **year-end compensation cycle**—data preparation, system inputs, testing rounds, and final reconciliation with Finance and Payroll—ensuring all merit, bonus, and incentive records are correctly updated before payroll cutoff.
- Administer the **education assistance** (\$100K/year) and **retention award** (\$100K/year) programs end-to-end—covering eligibility determination, approval workflows, vendor coordination, and payment uploads—with strict deadline adherence and clean documentation at each stage.
- Analyze employee pay data—salary positioning, incentive payouts, and pay-to-target ratios—to identify cases outside internal guidelines, flag pay equity concerns, and work with HR partners to resolve them ahead of payout cycles.
- Review and recommend **salary placements** for non-billable new hires, internal transfers, and promotions using compensation survey data and internal pay structures, ensuring consistency with program guidelines.
- Leverage Mercer, Radford, and WTW compensation survey data to benchmark roles against the external market, assess competitive positioning, and provide analytical support for pay structure and talent market decisions.
- Serve as Compensation Business Partner to HR Business Partners, Finance, and senior business leaders—advising on pay strategy, policy interpretation, and Total Rewards design decisions; regularly engage CPO-level stakeholders on program outcomes.
- Support the Executive Compensation team with reporting, ad hoc data pulls, and pay change tracking; manage the compensation mailbox, triaging and resolving queries from HR and business teams.
- Supported HR data and compensation activities during **corporate M&A transactions**—preparing employee data extracts, cross-checking compensation records against deal documentation, and coordinating clean handoffs for impacted employees.

- Use **Excel** extensively—pivot tables, VBA macros, Power Query, and data models—to build and automate recurring compensation reports, analyse pay trends, and surface data inconsistencies; rebuilt several manual reports to run with minimal human intervention.
- Write and maintain **SOPs** for all compensation processes, ensuring the team operates consistently, audit trails are complete, and documentation meets regulatory and internal compliance standards.

ADP (Automatic Data Processing)

Senior Analyst – HR & Payroll Operations

Hyderabad, Telangana, India

March 2014 – August 2021

- Managed high-volume employee lifecycle and payroll processing for US-based clients in **UKG Pro** and **ADP Workforce Now**—covering compensation changes, benefits administration, FMLA, and onboarding—consistently achieving SLA targets above 99%.
- Led **ADP Workforce Now implementation projects**—migrating payroll and HR data, configuring compensation elements, running testing cycles, and training client teams—building deep knowledge of how compensation and payroll systems work at the data and configuration level.
- Served as subject matter expert for US payroll, tax, and compliance questions; authored client-facing guidance and internal process documentation when regulations changed, ensuring compliance with applicable wage and hour requirements.
- Worked closely with US-based client teams and internal operations colleagues across time zones, managing competing priorities and deadlines effectively in a global delivery model.
